

The Sierra Club of Oklahoma presents its annual Environmental Scorecard for the Oklahoma Legislature as an indicator of each legislator's commitment to environmental stewardship and clean energy development.

Each legislator's score is based upon his/her individual votes upon issues of importance to the Sierra Club. While indicative of the legislator's overall voting trends, the scorecard does not include other important factors such as a legislator's introduction of bills supported or opposed by the Sierra Club.

The scorecard does not represent all legislation monitored by the Sierra Club during the 2009 legislative session.

Sierra Club of Oklahoma

Environmental Scorecard: 2009 Oklahoma Legislature

SB 831/HB 1750: SB 831 passed Senate 36-9/HB 1750 passed House 60-19 Both failed to advance through committee in opposite chamber **(Opposed)** Introduced as the "Nuclear Power Incentives Act", SB 831 and HB 1750 would have authorized developers of nuclear energy facilities to implement over-reaching cost recovery procedures for the planning, permitting, construction, and decommissioning of energy production facilities in Oklahoma. As these bills were a top priority for the Sierra Club, legislators serving on the House Energy and Utilities or Senate Energy and Environment committees were graded on both their committee and floor votes.

HB 1482: Passed House 96-4/Senate 40-2/Signed by Governor **(Opposed)** HB 1482 exempts agricultural operations from civil nuisance liability if in lawful operation for 2 years or more, including any subsequent expansions or implementations of new technology, regardless if it is connected to the original operation. This bill prevents property owners from protecting their interests against agricultural nuisances.

HB 1483: Passed House 91-5/Senate 45-0/Signed by Governor **(Supported)** Prioritizes in-state water uses over out-of-state water sales in the Oklahoma water appropriation permitting process. Although the Sierra Club supported an extension of the moratorium on out-of-state water sales until the completion of the statewide water plan, HB 1483 is seen as a necessary step in protecting Oklahoma's water resources.

HB 1948: Passed House 94-3/Senate 38-10/Died in Conference Committee **(Supported)** Would have authorized a 5% tax credit for tax years 2010 through 2014 for the residential installation of a geothermal heating and cooling system.

HB 1953: Passed House 92-5/Senate 44-1/Signed by Governor **(Supported)** Establishes wind industry jobs as eligible for benefits provided by the Oklahoma Quality Jobs Act.

HB 2247: Passed House 94-5/Senate 43-1/Died in Conference Committee **(Supported)** Would have provided a 40% tax credit beginning in the 2010 tax year for the installation of a wind or photovoltaic solar energy system.

SB 293: Passed House 92-8/Senate 45-1/Signed by Governor **(Supported)** Authorized the expenditure of funds by municipally owned utilities, public trusts, or the Grand River Dam Authority to assist consumers with energy conservation programs.

SB 833: Passed House 97-1/Senate 43-1/Signed by Governor **(Supported)** Directs state agencies to develop and implement energy efficiency and conservation plans and adopt policies encouraging the purchase of energy efficient appliances, vehicles, and renewable energy systems.
